

## Advanced Electronic Warfare Executive Director

As an Advanced Electronic Warfare Executive Director you will have the opportunity to lead several large, long-term, programs that we implement as small innovative teams. This arrangement allows focus on delivering to customer needs while offering teammates the maximum opportunity for contribution, and exchange of solutions and technologies.

### Essential Duties:

- Deliver products to customers supporting Electronic Warfare business and mission pursuits within the Intelligence Systems and Solutions market based upon Parry Labs products and capabilities to include the development, design, test, integration, deployment, delivery, and sustainment of the baseline/fielded products.
- Lead multiple large programs and several mid-size programs/projects, which would include multiple teams led by project/program managers.
- Practice excellent cost, schedule, and technical/performance controls on all assigned projects/programs to include configuration management and subcontractor/vendor management.
- Mentor/coach team members to achieve their goals and satisfy program needs.
- Establish approach to structure developments and product roadmaps which start with requirements analysis and address all necessary steps to achieve program success and customer satisfaction.
- Lead self-motivated individuals and assigned teams/programs to further technical solutions, increase profitability, communicate with stakeholders, collaborate with peers, and deliver mission success for our customers.
- Ensure processes are streamlined and solve problems in an efficient/effective manner no matter the complexity or technical depth required to achieve success especially when these areas impact multiple layers/programs within the organization.
- Requires ability to negotiate and compromise, and ability to communicate and influence senior executive leadership and Government decision-makers.

### Desired Qualifications include:

- Bachelor's degree in engineering, math, sciences or Federal acquisition.
- Experience over 15 to 20 years in positions of increasing responsibility delivering solutions/products to the Government.
- Experience establishing and implementing strategies that have long-term impact on the results for the program.
- Experience leading program teams to deliver solutions/products
- Experience leading personnel of varied levels of experience and from many different disciplines to achieve specific goals.
- Experience working with the Federal Government to fulfill their needs and deliver solutions/products.

# PARRY LABS

- Experience in design, development, and test of products/solutions to be delivered to the Government.
- Experience in signal acquisition, signal processing, and/or signal analysis.
- Experience in designing and delivering Electronic Warfare systems and solutions.

## Nice to Have:

- Master's degree in applicable discipline.
- Experience with modern software languages.
- Experience in standardizing and documenting complex products.

Candidates must be a US Citizen, and have the ability to obtain a US Government security clearance, and will be subject to a US security background investigation. An active security clearance is preferred.

**Parry Labs is an Equal Opportunity / Affirmative Action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex (including pregnancy, gender identity, and sexual orientation), national origin, age (40 or older), disability, genetic information, protected veteran status, or any other factor prohibited by applicable law.**
